- Possibility of customization with colours and **logo** chosen by the customer.
- The maintenance is practically non-existent.
- Outdoor placement possibility.

OPERATION DESCRIPTION AND TECHNICAL FEATURES

The compressor is OIL FREE or LUBRICATE type, and the maintenance is practically non-existent.

In order to reduce the noise emissions, the highly silent compressor is positioned inside a guard. The result allows one to use the machine in any given area of the Golf Club.

In the front of the machine is a galvanized steel grid where your foot is placed during the cleaning phase. Located under the same galvanized steel drawer that collects the dirt and dust.

On the grid are placement two fixed brushes to make easier the cleaning of golf shoes.

The compressor feeds two air guns for two selections that can be operated independently.

Machine is constructed in galvanized steel, painted and then oven baked with a rust proof and polyurethanic enamel.
